

## **Nkanyezi Stimulation Centre**

The Nkanyezi Stimulation Centre is an educational support centre for children with severe intellectual and other disabilities in Soweto, Johannesburg. The centre develops a firm foundation for the children through stimulation and teaching of life skills. The Deloitte Foundation has given a grant towards the centre's education and skills development initiatives. Funding contributed to the sound operation of the centre and to helping the 16 staff members provide an environment that encouraged the physical, cognitive and emotional development of its 40 children who are supported daily.
