

LEAP Maths and Science School

LEAP is a learning organisation which provides young South Africans with academic and the life skills they need to become productive and responsible citizens. LEAP schools have high expectations of youth and aim to transform our communities, one graduate at a time. The longstanding partnership between LEAP and Deloitte spans financial and non-financial support. In 2013, four LEAP students were provided with job-shadowing opportunities at Deloitte, providing them with exposure to the CA qualification. Our Cape Town office also hosted Grade 11 learners, where they acquired practical skills such as CV writing and interview techniques. Through Deloitte's grant the school purchased essential stationery, as well as learning materials such as examination papers and supplementary training material for the school's teacher development programme. The LEAP Class of 2012 proved that hard work pays off, with a 94.7% pass rate and 54 distinctions. Significantly, 89% of the students passed maths, compared to an average of 40% in the communities served by LEAP.
